► DEPILATORY SERIES

Depilatory Cream

Recommendations / Sensitivity Test :

Apply Agiss hair remover cream to a small area first, and wait 4 - 5 minutes then remove the cream with the provided plastic spatula and rinse the area with water. If your skins free from any irritations you can apply the cream to the other areas. This test helps you also to determine how long you should wait to get the best result, and also to know the needed quantity.

Smooth sparkle with Agiss!

Get Rid of Hair : Sensitive Skin

One of the main benefits of depilatory cream is painless , easy to use and ensure smooth results . They are not painful because instead of removing the hair follicle from the root, they dissolve the keratin proteins in the hair for a few minutes. In this way, when you clean the cream by wiping it with a spatula or washing it while taking a shower, the hairs on your skin are removed. It is perfect for people with low pain threshold or sensitive skin.
